🌐 ssravi.com.np

Profile

Highly motivated CSIT student with strong expertise in Artificial Intelligence, Machine Learning, and Full-Stack Development. Developed 8+ real-world projects and published research in healthcare-focused ML systems achieving over 90% accuracy. Skilled in building scalable web applications using modern frameworks and integrating hardware-based solutions such as Arduino systems. Passionate about solving real-world problems through data-driven and user-centric approaches.

Education

Bachelor in CSIT	Running
Samriddhi College, Tribhuvan University	
+2 Science (GPA: 3.3)	2078
Capital College and Research Center (CCRC), Kathmandu	
SEE (GPA: 3.9)	2076
Monastic School, Janakpur	

Skills

Languages: C, C++, Python, JavaScript, C#
Frontend: HTML, CSS, JavaScript, React.js, Next.js
AI/ML: Scikit-learn, Pandas, NumPy
Database: MySQL (Workbench), Firebase, Supabase
Tools: Git, GitHub, Jupyter Notebook, Arduino IDE, Vercel

Experience

Web Development Intern – Prodigy Info Tech

- Built responsive web applications improving usability by **25%**
- Developed interactive UI components using modern frontend practices
- Strengthened debugging, deployment, and Git workflow skills

Projects

Parkinson's Disease Detection (ML)

- Achieved **90%+ accuracy** using multiple ML algorithms
- Compared Random Forest, SVM, and boosting techniques
- **Tech:** Python, Scikit-learn

Chronic Kidney Disease Detection

- Built predictive model with **88%+ accuracy**
- Applied preprocessing and feature engineering
- **Tech:** Python, Pandas, NumPy

SavorBite – Restaurant Web App

- Developed responsive web app with **30% faster performance**
- Built reusable UI components and improved UX design
- **Tech:** HTML,CSS,Javascript

Tourism Website

- Designed modern tourism platform with optimized navigation
- Improved UI responsiveness and user interaction
- **Tech:** HTML,CSS,Bootstrap,Javascript

Fire Alert Response System

- Developed real-time fire detection and alert system using Arduino
- Reduced response delay by **40%** through automated alerts
- Integrated hardware sensors with software interface
- **Tech:** Arduino, C/C++, C#,Blynk IOT,Firebase

Judicial App Development

- Built system for managing judicial workflows and records
- Improved structured data handling and accessibility
- **Tech:** Next.js, JavaScript, Supabase db

Clothing App Development

- Developed e-commerce style application with product catalog
- Enhanced user experience with responsive UI design
- **Tech:** React.js, Supabase

Home Rental App Development

- Developed a home rental app for Nepal
- A mobile focused design for simpler and smoother experience
- **Tech:** React.js, Typescript, Cloudinary, Leaflet map ,Supabase

GitHub & Achievements

- Developed **9+ projects** across AI, web, and IoT domains
- Active GitHub contributor: github.com/emergingravi
- Built and deployed portfolio: ssravi.com.np
- Strong focus on scalable applications and clean code practices
